**Dr.Harsha Vardhan Reddy, MD, Asst. Prof, Dept. of Gen.Med, AVMC & H, Puducherry**

19.12.2016, “Hepatitis Day” is a Landmark for unifying the length and breadth of India, fostering, “Unity in Diversity” on a platform of first day E learning contact program of ILBS, caressing our Prime Minister Modi’s Digital India Initiative in the Health Care Sector.

Tele-Therapy initiative of ILBS connects 52 Asian Countries, ARC program having a database of 3000 liver patients – acute and chronic is a commendable one.

It is reassuring that 1000 patients have been treated so far. 38 Medical Colleges has been drawn into the fold and Deans have been inducted. Aarupadai Veedu Medical College & Hospital, Puducherry a constituent College of Vinayaka Missions University, Pondicherry.

Launching of Website was very impressive. The Administrative hierarchy, IT infrastructure and EDP Communications were broadly outlined.

Dr.Ajith and myself would stress that this ECHO Project must go to the Villages, Primary and Secondary care District Hospitals, Primary Health Centres, NGO’s ASHA workers, Anganwadis and other grass root level workers.

The Medical tour to the six sites of the Hospital was heartwarming, very innovative with Health Care Services at nominal cost.

In future we look forward to have collaboration with this Temple of Excellence ILBS, with many more programmes on the anvil-the road map to success, to replicate, to sustain and to excel, in the cause of humanity at large.
